More comfort, more milk

Breast pump with massage cushion

When you are comfortable and relaxed, your milk flows more easily. That is why we created our most comfortable breast pump yet: Sit comfortably with no need to lean forward and let our soft massage cushion gently stimulate your milk flow.

Sit more comfortably with no need to lean forward

- More comfortable pumping position due to unique design

Gently stimulates natural let down and milk flow

- Soft massage cushion with warm feel

Other benefits

- Includes our Natural bottle and nipple for natural latch on
- Intuitive assembly. Easy visual matching of parts
- Compact lightweight design, includes handy travel bag
- Easy cleaning due to the small number of separate parts
- Easy operation at the touch of a button

Choose your most comfortable setting

- Features a gentle stimulation mode and 3 pumping settings

More milk in less time

- The perfect time saver for moms

PHILIPS
AVENT

Highlights

More comfortable position

The breast pump has a unique design, so your milk flows directly from your breast into the bottle, even when you are sitting up straight. This means you can sit more comfortably when pumping: no need for you to lean forward to make sure all your milk ends up in the bottle. Sitting comfortably and being relaxed when pumping, naturally helps your milk to flow more easily.

Simple settings to choose from

When switched on, the pump automatically starts in gentle stimulation mode to get your milk flowing. Then choose from 3 pumping settings to make milk flow most comfortable for you.

Easy cleaning

Cleaning is easy, thanks to the small number of separate parts. Your milk will never come into contact with the tubing and base unit. All parts

are dishwasher proof, except the electrical parts.

Easy operation

Double electric breast pumps are ideal for moms who pump milk regularly. Save time by comfortably pumping from both breasts at once.

Perfect time saver for moms

Simultaneous pumping at both breasts is proven more efficient and may even boost your ability to produce breast milk.**

Intuitive assembly

Easy visual matching of parts for intuitive assembly.

Compact design

The breast pump has a compact design, which makes it easy to hold and position on your breast. The small, lightweight base unit can easily be placed within comfortable reach for full

control when pumping. For extra convenience in transport and storage, the tube simply wraps around the base unit. The breast pump comes with a handy travel bag.

Includes our Natural nipple

The wide breast shaped nipple promotes natural latch on similar to the breast, making it easy for your baby to combine breast and bottle feeding.

Soft massage cushion

Our massage cushion has a soft velvety texture that gives a warm feel to the skin for comfortable, gentle stimulation of your milk flow. During pumping, it gently mimics your baby's suckling for natural let down and clinically proven effectiveness. The soft massage cushion is designed to comfortably fit the majority of moms. Should you need it, a smaller size cushion is available separately.

Specifications

Country of origin

- England

Material

- Breast pump: BPA free*, Polypropylene
- Bottle: BPA free*, Polypropylene
